

Public Finance and Public Debt Report, November 2006

The public finances and public debt preliminary results up to November 2006 were released today.

The main results for November are the following:

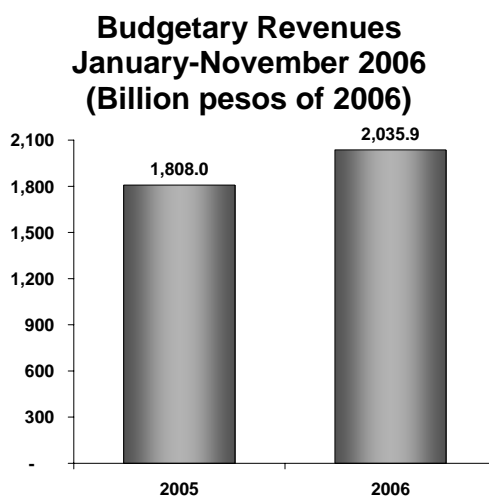

- The public sector posted a Ps. 1.7 billion surplus, which is in line with the fiscal balance authorized by Congress for 2006 as a whole.
- The primary balance, defined as total revenues minus non-interest expenditures, posted a Ps. 23.1 billion surplus.
- Budgetary revenues grew 4.3 percent in real annual terms due mainly to the real increases of 6.2 percent and 3.4 percent in VAT and income tax receipts, respectively.
- Net budgetary expenditures increased 2.7 percent in real annual terms. During this month Ps. 7.1 billion were destined to the State Infrastructure Fund (FIES) and the State Revenue Stabilization Fund (FEIEF) pertaining to the Duty on Oil Revenues (ARE) and the Extraordinary Right on Crude Oil Exports, respectively.
- In terms of public debt, the early payments of debt to International Financial Organizations announced in June were concluded. Additionally, the positive results of the third and fourth series of debt exchange warrants stand out. These debt substitution operations allowed the Federal Government to continue reducing external debt and to take advantage of the favorable conditions present in the domestic market.
- The Federal Government's net domestic debt increased Ps. 24.3 billion while its net external debt decreased US\$ 2.8 billion, both with respect to October 2006.
- The public sector's net domestic debt decreased Ps. 5.5 billion and its net external debt decreased US\$ 3.3 billion, both with respect to the previous month.

1. Public Sector Balance in January-November 2006

- Up to November 2006, the public sector posted a surplus of Ps. 158.5 billion, Ps. 51.0 billion higher than the one registered in the same eleven months of the previous year. The primary balance, defined as total revenues minus non-interest expenditures, posted a Ps. 378.9 billion surplus, 23.4 percent higher in real terms than the one registered in the same period of 2005.

1.1 Public Sector Budgetary Revenues in January-November 2006

- The public sector's budgetary revenues stood at Ps. 2,035.9 billion during January-November 2006. This amount is 12.6 percent higher in real terms than that registered during the same period of 2005. The annual change is explained by the following:
 - Non-oil tax revenues amounted to Ps. 857.6 billion, 14.3 percent higher in real terms than in the same period of the previous year. VAT and income tax receipts stand out with increases, in real terms, of 16.7 and 13.4 percent, respectively.
 - Oil-related revenues, which include PEMEX's own revenues, royalties and fees, excise tax collection on gasoline and diesel, and the tax on oil returns, totaled Ps. 748.8 billion, 12.3 percent higher in real terms than those registered in the same eleven months of the previous year.
 - Revenues from public entities under direct budgetary control other than PEMEX totaled Ps. 348.4 billion, 7.7 percent higher than those registered in the same period of 2005. This is mainly due to higher energy sales by CFE and social security contributions to IMSS.¹
 - Non-tax non-oil revenues were Ps. 81.1 billion. This amount is 19.5 percent higher than in the same eleven months of 2005. This is mainly explained by higher non-recurring revenues in 2006 due to the sale of *Grupo Aeroportuario Centro-Norte* and *Grupo Aeroportuario del Pacifico*.

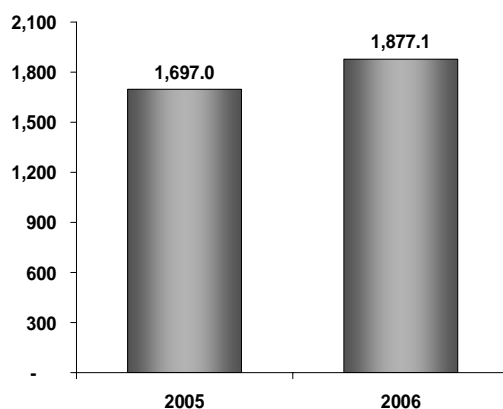

¹ It is important to note that as a result of the amendment to article 174 of ISSSTE's law approved by Congress, operations of the Housing Fund will not be registered in public sector records starting March 2006, given the resolution that these resources are the property of public sector workers and therefore they are not considered part of ISSSTE's capital.

1.2. Net Budgetary Public Sector Expenditures during January-November 2006

- Net budgetary expenditures of the public sector totaled Ps. 1,877.1 billion in the first eleven months of the year. This amount is 10.6 percent higher in real terms than that observed in the same period of 2005.
- Paid programmable expenditures amounted to Ps. 1,342.1 billion, 8.7 percent higher in real annual terms than that registered in the same months of 2005. Within, the increases to spending on education, health, social development, social security, energy, transport and communications and expenditures related to the electoral process stand out.

**Net Budgetary Expenditures
January-November 2006
(Billions pesos of 2006)**

- Federalized spending, which includes revenue sharing allocated to States and Municipalities, as well as resources transferred to these entities (*Ramo 33*), provisions for basic, normal, technical and adult education (*Ramo 25*), and the resources directed towards the financial strengthening of States through PAFEF (*Ramo 39*), increased 10.0 percent in real annual terms.
 - Revenue sharing to States and Municipalities was Ps. 307.1 billion, and increased 15.7 percent in real annual terms.
 - Total resources distributed through *Ramo 25*, *Ramo 33* and *Ramo 39* were Ps. 340.8 billion, 5.3 percent higher in real annual terms than those observed in the first eleven months of 2005.
 - A total of Ps. 19.5 billion have been destined to Federal Entities through the State Infrastructure Fund (FIES) and the State Revenue Stabilization Fund (FEIEF) pertaining to the Extraordinary Right on Crude Oil Exports (DEEP) and the Duty on Oil Revenues (ARE).

- The Public Sector's financing costs during January-November 2006 totaled Ps. 212.5 billion. This amount was 12.7 percent higher in real terms than that registered in the same period a year earlier.

2. Public Debt Update

- The Federal Government's net domestic debt's balance was Ps. 1,360.1 billion at the end of November 2006. This was Ps. 176.7 billion higher than the balance registered at the end of 2005. This is due to net borrowing of Ps. 419.3 billion, upward adjustments to the inflation-indexed debt for Ps. 7.4 billion, and an increase in the Federal Government's financial assets of Ps. 250.0 billion.
- At the end of November 2006 the balance of the Federal Government's net external debt balance was US\$ 39.1 billion, US\$ 14.9 billion lower than in December 31st 2005. The decrease is due to a reduction in net debt of US\$ 18.4 billion, upward accounting adjustments for US\$ 1.5 billion, and a decrease of financial assets abroad of US\$ 2.0 billion.
- The balance of the Federal Public Sector's (Federal Government, PEDBC's and development banks) net domestic debt was Ps. 1,326.7 billion at the end of November 2006. This was Ps. 76.7 billion higher than the balance registered at the end of 2005. This is due to net borrowing of Ps. 371.5 billion, upward accounting adjustments for Ps. 34.1 billion, and an increase in the Public Sector's financial assets of Ps. 328.9 billion.
- The net balance of the Federal Public Sector external debt stood at US\$ 49.9 billion at the end of November 2006, US\$ 15.8 billion lower than in December 31st 2005. This is due to a reduction in net debt of US\$ 18.8 billion, upward accounting adjustments for US\$ 2.3 billion, and a decrease of the financial assets abroad of US\$ 0.7 billion.

More details on Public Finance and Public Debt statistics can be obtained in the Ministry of Finance's web page at:
