

Mexico City, February 29th, 2008.

## Public Finance and Public Debt Report, January 2008

The public finance and public debt preliminary results of January 2008 were released today.

The main results for January are the following:

- The public sector posted a Ps. 37.8 billion surplus, which is in line with the fiscal balance authorized by Congress for 2008 as a whole.
- Budgetary revenues registered a 4.8 percent decrease in real annual terms, due
  mainly to the higher non-recurring revenues registered in 2007 from the sale of
  Grupo Aeroportuario Centro-Norte, the minimum Guaranteed Return from PEMEX,
  as well as other royalties and fees. After adjusting for those resources, budgetary
  revenues would show an increase of 5.6 percent.
- Income tax and VAT revenues posted increases in real annual terms of 8.2 and 5.8 percent, respectively.
- Programmable expenditures registered a 10.0 percent increase in real annual terms
- Federalized spending increased 20.2 percent in real annual terms.
- The public sector's net domestic debt increased by Ps. 16.2 billion while its external debt balance increased US\$ 4.5 billion, both with respect to December 2007. The increase in external indebtedness is transitory and will gradually decrease as debt is amortized in the coming months.

## Evolution of the Public Finances during January

Up to January 2008, the public sector balance posted a surplus of Ps. 37.8 billion, Ps. 13.8 billion lower than the one registered in the same period of the previous year. The primary balance, defined as total revenues minus non-interest expenditures, posted a Ps. 58.4 billion surplus, Ps. 21.6 billion lower than the one registered in January 2007.

## Public Sector Budgetary Revenues during January

The public sector's budgetary revenues were Ps. 231.8 billion, amount which is 4.8 percent lower in real terms than that registered during the same period of the previous year. This behavior is explained by higher non-recurring revenues registered in 2007 from the sale of Grupo Aeroportuario Centro-Norte, the minimum Guaranteed Return from PEMEX, as well as other royalties and fees which were not observed this year. After adjusting for

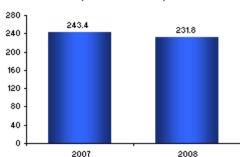

Mexico City, February 29th, 2008.

those resources, budgetary revenues would show an increase of 5.6 percent in real annual terms. The evolution of the main components of budgetary revenues is the following:

### BUDGETARY REVENUES, JANUARY

(Billion Pesos of 2008)

- Non-oil tax revenues amounted to Ps. 122.9 billion, 8.2 percent higher in real terms than those observed during January 2007. Worth noting are income tax and VAT increases in real annual terms of 8.2 and 5.8 percent, respectively. The collection of the Unique Rate Corporate Tax (IETU) and the Tax on cash deposits will be reflected in the fiscal accounts of February, time of the year when taxpayers made the first provisional payments for these new contributions which came into effect starting in January, 2008.
- Oil related revenues (which include PEMEX's own revenues, royalties and fees, excise tax collection on gasoline and diesel, and the tax on oil returns) totaled Ps. 69.9 billion, amount that is 6.5 percent higher in real terms than those registered in the same period of the previous year. This result is explained by the higher price of Mexican oil exports.

- Revenues of public entities under direct budgetary control other than PEMEX totaled Ps. 30.9 billion, which represents a decrease of 3.3 percent with respect to those registered in the same month of 2007. This figure is explained by the following: lower revenues from energy sales; the new ISSSTE Law which modifies the frequency of pension contributions from a biweekly to a bimonthly period, and the fact that CFE will account its financial cost using the accounting criteria as the Federal Government (interest payments on liabilities less financial received financial interests on available assets).
- Non-tax non-oil revenues were Ps. 8.1 billion, amount that is 74.9 percent lower, in real terms, than that observed in the same period of the previous year. This result is mainly due to higher non-recurrent resources obtained in 2007.

### Net Budgetary Public Sector Expenditures during January

During the first month of the year, the net budgetary expenditures of the public sector totaled Ps. 192.7 billion, amount that is 5.8 percent higher in real terms than the one observed in the same month of 2007.

30

Mexico City, February 29th, 2008.

#### 

NET BUDGETARY EXPENDITURE,

Paid programmable expenditures totaled Ps. 140.9 billion, which is 10.0 percent higher in real terms than the one observed in the same period of the previous year. The higher expenditures have been channeled to social development programs such education, urbanization, housing and regional development; pensions, national and public security; and productive activities, among them higher investment expenditures in CFE and PEMEX and programs of the Ministry of Economy.

Federalized spending, which includes shared revenues allocated to Federal Entities and Municipalities, as well as resources transferred to these entities through wage and economic provisions, decentralization agreements and reallocations increased 20.2 percent in real terms. Shared revenues registered a 47.8 percent increase in real terms, due to a higher collection of Federal shared revenues while the rest of the resources distributed to Federal Entities and Municipalities registered a 6.8 percent increase in real terms.

The Public Sector's financial cost was Ps. 17.5 billion, amount that is 12.4 percent

lower in real terms than the registered in the same period of last year. It is worth noting that in the Federation's Expenditure Budget for 2008 publication methodology of the financial cost of PEDBC's was adjusted to use the same accounting criteria for that of the Federal Government (interest payments on financial liabilities less received interests on available financial assets). After adjusting for the effect of this measure, which does not alter the result of public finances only its presentation, the financial cost would decrease by 4.6 percent.

#### Public debt update to January

At the end of January, the Federal Government's net domestic debt balance was Ps. 1,761 billion, amount that is Ps. 27.4 billion lower than the amount observed at the end of 2007. The change in balance is explained by net indebtedness of Ps. 15.6 billion, upward adjustments to the inflation-indexed debt of Ps. 4.3 billion and an increase in the Federal Government's financial assets of Ps. 47.3 billion.

The balance of the Federal Government's net external debt at the end of January was US\$ 41.9 billion, US\$ 0.6 billion higher than the amount observed on December 31, 2007. The increase is due to net indebtedness by US\$ 1.5 billion, upward accounting adjustments by US\$ 0.1 billion, and an increase in financial assets in foreign currency of US\$ 1.0 billion.

The balance of net domestic debt of the Federal Public Sector (Federal Government, PEDBC's and development

Mexico City, February 29th, 2008.

banks) at the end of the first month of the year was Ps. 1,730.8 billion, which implies a Ps. 16.2 billion increase with respect to the closing balance of 2007. This is due to net domestic borrowing of Ps. 36.9 billion, upward accounting adjustments by Ps. 10.7 billion and an increase in the Public Sector's financial assets by Ps. 31.4 billion.

The net balance of the Federal Public Sector's external debt stood at US\$ 39.1 billion, amount that is higher than that observed in December 2007 by US\$ 4.5 billion. This is due to net external indebtedness by US\$ 5.4 billion during 2007, upward accounting adjustments by

US\$ 0.8 billion and an increase in financial assets abroad by US\$ 1.7 billion.

It is worth noting that the increase in external indebtedness is transitory and will gradually decrease as debt is amortized in the coming months, which is consistent with the financing program for this year and the net external debt decrease approved by Congress.

More details on Public Finance and Public Debt statistics can be obtained in the Ministry of Finance's web page at:

www.apartados.hacienda.gob.mx/clon\_estadisticas/index.html

Mexico City, February 29th, 2008.
