

Public Finance and Public Debt Report, July 2008

The public finance and public debt preliminary results as of July 2008 were released today.

The main results for the January-July period are the following:

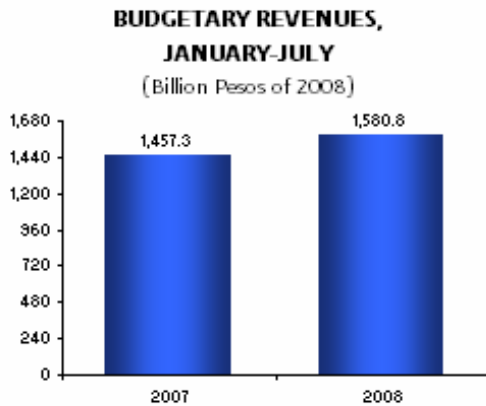

- The public sector posted a Ps. 91.6 billion surplus, which is in line with the fiscal balance authorized by Congress for 2008 as a whole.
- Budgetary revenues registered an 8.5 percent increase in real annual terms with respect to the same period of last year, due mainly to non oil tax revenues and revenues from oil related activities, which registered a 10.9 and 11.4 percent increase in real annual terms, respectively.
- Income tax collection, which includes the Unique Rate Corporate Tax, posted a 13.5 percent real increase; while revenues from Excise taxes, VAT and Import taxes posted increases in real annual terms of 9.0, 8.4 and 7.9 percent, respectively.
- Programmable expenditures registered a 14.1 percent increase in real annual terms with respect to the same period of previous year. Worth noting are the increases in expenditures channeled to physical investment, pensions and social development programs.
- Federalized expenditures increased 16.6 percent in real annual terms with respect to 2007. Shared revenues registered a 23.4 percent increase in real terms.
- The public sector's net domestic debt increased by Ps. 172.3 billion while its external debt decreased US\$ 11.3 billion, both with respect to December 2007.

Evolution of the Public Finances during January-July

Up to July 2008, the public sector's balance posted a surplus of Ps. 91.6 billion, Ps. 35.4 billion lower than the one registered in the same period of the previous year. The primary balance, defined as total revenues minus non-interest expenditures, posted a Ps. 226.4 billion surplus, Ps. 45.7 billion lower than the one registered during the January-July period of 2007. These figures are in line with the fiscal balance authorized by Congress for 2008.

Public Sector Budgetary Revenues during January-July

The public sector's budgetary revenues were Ps. 1,580.8 billion, amount which is 8.5 percent higher in real terms than the one registered during the same period of the previous year. The evolution of the main components of budgetary revenues is the following:

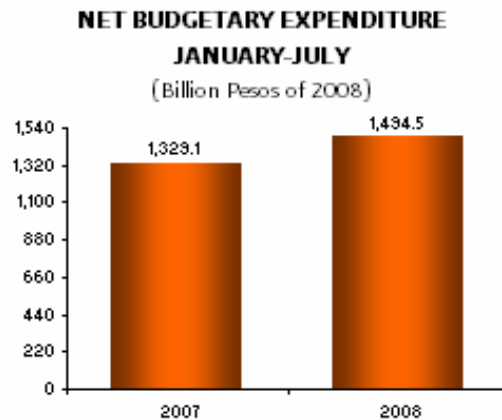

- Non-oil tax revenues were Ps. 734.7 billion, 10.9 percent higher in real terms than those observed during the January-July 2007 period. Worth highlighting is the increase in real annual terms of income tax collection, which includes the Unique Rate Corporate Tax, of 13.5 percent, as well as the increase in Excise taxes, VAT and Import taxes of 9.0, 8.4 and 7.9 percent, respectively
- Oil related revenues (which include PEMEX's own revenues, royalties and fees, excise tax collection on gasoline and diesel, and the tax on oil returns) totaled Ps. 544.7 billion, amount that is 11.4 percent higher in real terms than those registered in the same period of the previous year. This result is explained by the higher price of Mexican oil exports (91.6 dpb compared with 51.9 dpb observed in the same period last year, which implies a 76.6 percent increase). This compensated for the decrease in the oil export platform of 13.7 percent, the 57.8 percent real increase in the value of imports and the observed exchange rate appreciation of 7.5 percent, all these with respect to the same period of the previous year.

- Revenues of public entities under direct budgetary control other than PEMEX totaled Ps. 245.2 billion, which represents an increase of 4.7 percent with respect to those registered in the same period of 2007.
- Non-tax non-oil revenues were Ps. 56.1 billion, amount that is 21.9 percent lower, in real terms, than that observed in the same period of the previous year. This result is mainly due to higher non-recurrent revenues obtained in 2007.

Net Budgetary Public Sector Expenditures during January-July

During the first seven months of the year, the net budgetary expenditures of the public sector totaled Ps. 1,494.5 billion, amount that is 12.4 percent higher in real terms than the one observed in the same period of 2007.

Paid programmable expenditures totaled Ps. 1,085.7 billion, which is 14.1 percent higher in real terms than the one observed in the same period of the previous year. The higher expenditures were channeled to social development programs such as education, health, urbanization, housing and regional

development, pensions, national and public security and agricultural development; and productive activities, among them higher investment expenditures in CFE and PEMEX and programs of the Ministries of Transport and Communications and Economy, as well as the increase in CFE's operating expenses due to the higher cost of fuel used for the generation of energy.

Federalized expenditures, which includes shared revenues allocated to Federal Entities and Municipalities, as well as resources transferred to these entities through wage and economic provisions, decentralization agreements and reallocations increased 16.6 percent in real terms. Shared revenues registered a 23.4 percent increase in real terms, due to a higher collection of Federal shareable revenues while the rest of the resources distributed to Federal Entities and Municipalities registered an 11.5 percent increase in real terms.

The Public Sector's financial cost was Ps. 129.1 billion, amount that is 11.1 percent lower in real terms than the one registered in the same period of last year. It is worth noting that in the Federation's Expenditure Budget for 2008 the reporting methodology of the financial cost of PEDBC's was adjusted to use the same accounting criteria for that of the Federal Government (interest payments on financial liabilities less received interests on available financial assets). After adjusting for the effect of this measure, which does not alter the results of public finances but only their presentation, the financial cost would decrease by 0.5 percent in real terms.

Public debt update to July

At the end of July, the Federal Government's net domestic debt was Ps. 1,914.2 billion,

amount that is Ps. 125.9 billion higher than the amount observed at the end of 2007. The change in the stock is explained by net indebtedness of Ps. 119.1 billion, upward adjustments to the inflation-indexed debt by Ps. 11.2 billion and an increase in the Federal Government's financial assets of Ps. 4.5 billion.

The stock of the Federal Government's net external debt at the end of July was US\$ 32.5 billion, US\$ 8.8 billion lower than the one observed on December 31, 2007. The increase is due to a US\$ 1.6 billion net debt-amortization, upward accounting adjustments by US\$ 0.7 billion, and a financial assets increase in foreign currency of US\$ 7.8 billion.

The net domestic debt of the Federal Public Sector (Federal Government, PEDBC's and development banks) at the end of July was Ps. 1,859.1 billion, amount Ps. 172.3 billion higher with respect to the closing balance of 2007. This is due to net domestic borrowing of Ps. 140.7 billion, upward accounting adjustments by Ps. 17.9 billion and a decrease in the Public Sector's financial assets by Ps. 13.7 billion.

The Federal Public Sector's net external debt stood at US\$ 23.2 billion, amount that is lower than that observed in December 2007 by US\$ 11.3 billion. This is due to net external indebtedness by US\$ 0.6 billion, upward accounting adjustments by US\$ 1.2 billion and an increase in financial assets abroad by US\$ 13.1 billion.

It is worth noting that the increase in the Federal Government's financial assets in foreign currency is the result of the purchase of US\$ 8 billion from the International Reserve of Banco de Mexico at the end of July 2008.

Press Release

Mexico City, August 29th, 2008.
