

PUBLIC FINANCE AND PUBLIC DEBT REPORT, NOVEMBER 2008

The public finance and public debt preliminary results as of November 2008 were released today.

The main results for the January-November period are the following:

- **The public sector posted a Ps. 231.7 billion surplus, which is in line with the balanced budget authorized by Congress for 2008 as a whole.**
- **Budgetary revenues registered an 11.7 percent increase in real annual terms with respect to the same period of last year, due mainly to higher revenues from oil related activities and non oil tax revenues, which registered a 22.9 and 12.0 percent increase in real annual terms, respectively.**
- **Income tax collection, which includes the Unique Rate Corporate Tax, posted a 12.6 percent real increase; while revenues from Value Added, Import and Excise taxes posted increases in real annual terms of 9.4, 6.4 and 4.1 percent, respectively.**
- **Programmable expenditures registered a 13.1 percent increase in real annual terms with respect to the same period of the previous year. Worth noting are the increases in expenditures channeled to physical investment, pensions and social development programs.**
- **Federalized expenditures increased 15.4 percent in real annual terms with respect to the January-November period of 2007. Shared revenues registered a 22.3 percent increase in real annual terms.**
- **The public sector's net domestic debt increased by Ps. 158.2 billion while its external debt decreased by US\$ 10.1 billion, both with respect to December 2007.**

Evolution of the Public Finances during January-November

Up to November 2008, the public sector's balance posted a surplus of Ps. 231.7 billion, amount Ps. 39.6 billion higher than the one registered in the same period of the previous year. The primary balance, defined as total revenues minus non-interest expenditures,

posted a Ps. 399.8 billion surplus, amount Ps. 4.5 billion higher than the one registered during the January-November period of 2007. These figures are in line with the balanced budget authorized by Congress for 2008.

Public Sector Budgetary Revenues during January-November

The public sector's budgetary revenues were Ps. 2,588.8 billion, amount which is 11.7 percent higher in real terms than the one registered during the same period of the previous year. The evolution of the main components of budgetary revenues is the following:

- Non-oil tax revenues were Ps. 1,117.2 billion, 12.0 percent higher in real terms than those observed during the January-November period of the previous year. Worth highlighting is the increase in real annual terms in income tax collection, which includes the Unique Rate Corporate Tax, of 12.6 percent, as well as the increases in VAT, Import and Excise taxes of 9.4, 6.4 and 4.1 percent, respectively. Collection of the Tax on cash deposits was Ps. 14.9 billion.
- Oil related revenues (which include PEMEX's own revenues, royalties and fees, excise tax collection on gasoline and diesel, and the tax on oil returns) totaled Ps. 972.2 billion, amount that is 22.9 percent higher in real terms than those registered in the same period of the previous year. This result is explained by

the higher price of Mexican oil exports (94.0 dpb compared with 57.0 dpb observed in the same period of last year, which implies a 65.0 percent increase). This compensated for the decrease in the oil export platform of 15.7 percent, the 53.5 percent real increase in the value of imports and the observed exchange rate appreciation of 6.6 percent, all these with respect to the same period of the previous year.

- Revenues of public entities under direct budgetary control other than PEMEX totaled Ps. 404.9 billion, which represents an increase of 6.5 percent with respect to those registered in the same period of 2007.
- Non-tax non-oil revenues were Ps. 94.5 billion, amount that is 36.4 percent lower in real terms than that observed in the same period of the previous year. This result is mainly due to higher nonrecurrent revenues obtained in 2007.

Net Budgetary Public Sector Expenditures during January-November

During the first eleven months of the year, the net budgetary expenditures of the public sector totaled Ps. 2,364.3 billion, amount that is 12.0 percent higher in real terms than the one observed in the same period of 2007.

Paid programmable expenditures totaled Ps. 1,789.2 billion, which is 13.1 percent higher in real terms than the one observed in the same period of the previous year. The higher expenditures were channeled to social development programs such as education, health, urbanization, housing and regional development, pensions, national and public

security and agricultural development; and productive activities, among them higher investment expenditures in CFE and PEMEX and programs of the Ministries of Transport and Communications and Economy, as well as the increase in CFE's operating expenses due to the higher cost of fuel used for the generation of energy.

**BUDGETARY NET EXPENDITURES,
JANUARY-NOVEMBER
(billion pesos of 2008)**

Federalized expenditures, which include shared revenues allocated to Federal Entities and Municipalities, as well as resources transferred to these entities through wage and economic provisions, decentralization agreements and reallocations increased 15.4 percent in real terms. Shared revenues registered a 22.3 percent increase in real terms, due to a higher collection of Federal shareable revenues while the rest of the resources distributed to Federal Entities and Municipalities registered a 10.3 percent increase in real annual terms.

The Public Sector's financial cost was Ps. 164.8 billion, amount that is 16.1 percent lower in real terms than the one registered in the same period of last year. It is worth noting that in the Federation's Expenditure Budget for 2008 the reporting methodology of the financial cost of PEDBC's was adjusted to use the same accounting criteria for that of the Federal Government (interest payments

on financial liabilities less received interests on available financial assets). After adjusting for the effect of this measure, which does not alter the results of public finances but only their presentation, the financial cost would decrease by 3.8 percent in real terms.

Public debt update to November

At the end of November, the Federal Government's net domestic debt was Ps. 1,904.9 billion, amount that is Ps. 116.6 billion higher than the amount observed at the end of 2007. The change in the stock is explained by net indebtedness of Ps. 231.8 billion, upward adjustments to the inflation indexed debt by Ps. 21.6 billion and an increase in the Federal Government's financial assets of Ps. 136.9 billion.

The stock of the Federal Government's net external debt at the end of November was US\$ 37.1 billion, amount US\$ 4.2 billion lower than the one observed on December 31, 2007. The decrease is due to a net amortization of US\$ 4.0 billion, downward accounting adjustments by US\$ 0.5 billion, and a decrease in financial assets in foreign currency of US\$ 0.3 billion.

The net domestic debt of the Federal Public Sector (Federal Government, PEDBC's and development banks) at the end of November was Ps. 1,845.0 billion, amount Ps. 158.2 billion higher than the stock at the end of 2007. This is due to net domestic borrowing of Ps. 254.7 billion, upward accounting adjustments by Ps. 46.3 billion and an increase in the Public Sector's financial assets by Ps. 142.9 billion.

The Federal Public Sector's net external debt stood at US\$ 24.4 billion, amount that is lower than that observed in December 2007 by US\$ 10.1 billion. This is due to a net

Press Release

Mexico City, November 30th, 2008.

external amortization by US\$ 2.8 billion, upward accounting adjustments by US\$ 0.5 billion and an increase in foreign financial assets by US\$ 7.8 billion.

More details on Public Finance and Public Debt statistics can be obtained in the Ministry of Finance's web page at:
