

PUBLIC FINANCE AND PUBLIC DEBT REPORT, APRIL 2010

The public finance and public debt preliminary results as of April 2010 were released today.

The main results during the January-April period are the following:

- **The public sector posted a Ps. 8.5 billion surplus and if PEMEX's investment is excluded the public balance would register a surplus of Ps. 83.2 billion, results consistent with the approved public deficit for the year.**
- **Budgetary revenues were lower by 2.3 percent in real annual terms with respect to the same period of last year, due to the revenues received in April 2009 by Ps. 95 billion from the remnant of operation of Banco de Mexico. The decrease in revenues is temporary and budgetary revenues increased by 8.7 percent in real terms when adjusting for the remnant.**
- **Oil and non-oil tax revenues increased by 13.9 and 11.4 percent in real terms, respectively.**
- **Net expenditures were similar to those registered in the same period of the previous year in real annual terms. Within programmable expenditures, worth mentioning are the increase in resources channeled to health, social security and investment in the energy sector.**
- **Shared revenues increased by 16.6 percent in real terms.**
- **The Federal Public Sector's net domestic debt increased by Ps. 5.3 billion and the Federal Public Sector's net external debt increased by US\$ 2.5 billion, both with respect to the end of 2009.**

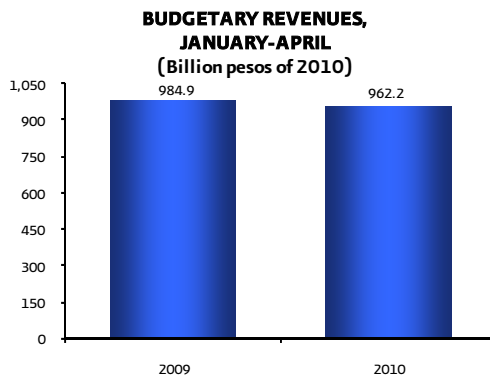

Evolution of the Public Finances during January-April

As of April 2010, the Public Sector's balance posted a surplus of Ps. 8.5 billion. The primary balance posted a Ps. 59.1 billion surplus. If PEMEX's investment is excluded, the public sector's balance would register a Ps. 83.2 billion surplus. These results are consistent with the approved deficit for 2010, in compliance with Article 17 of the Federal Budget and Fiscal Responsibility Law.

Public Sector Budgetary Revenues during January-April

The public sector's budgetary revenues were Ps. 962.2 billion, amount 2.3 percent lower in real terms than the one registered during the same period of the previous year. The decrease is due to the non-recurrent revenues that were registered in April 2009 by Ps. 95 billion from remnant of operation of Banco de Mexico. Throughout the year, revenues from other sources will compensate for the

decrease in these revenues. Adjusting for the remnant received last year, budgetary revenues increased by 8.7 percent with respect to those observed in 2009. The evolution of the main components of budgetary revenues was the following:

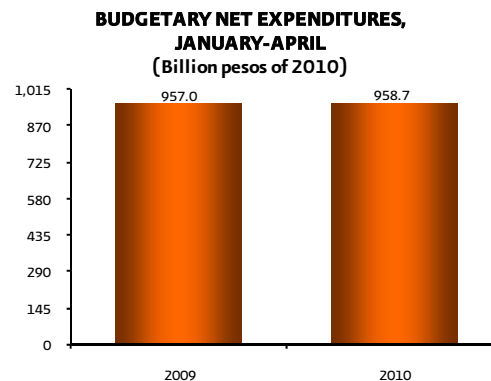

- Non-oil tax revenues were Ps. 479.5 billion, amount 11.4 percent higher in real terms than that observed during the January-April period of the previous year. VAT and Income tax collection (which includes the IETU and the Tax on Cash Deposits) increased by 19.9 and 7.3 percent in real terms, respectively.
- Oil related revenues (which include PEMEX's own revenues, royalties and fees, excise tax collection on gasoline and diesel, and the tax on oil returns) totaled Ps. 299.2 billion, amount that is 13.9 percent higher in real terms than that registered in the same period of 2009. This result is explained mainly by the higher price of the Mexican oil mix (71.1 dpb compared with 37.7 dpb observed in the same period of last year), which was partially offset by the real appreciation of the exchange rate by 13.8 percent with respect to the same period of the previous year, the higher value of hydrocarbons' imports by 59.0 percent in real terms and the declines in the oil

production and export platforms of 2.8 and 3.4 percent, respectively.

- Revenues of public entities under direct budgetary control other than PEMEX were Ps. 139.5 billion, which represented a decrease of 1.8 percent in real terms with respect to those registered in the same period of the previous year. This is mainly explained by a lower average price of electricity.
- Non-tax non-oil revenues totaled Ps. 44.0 billion, amount lower by 70.6 percent in real terms with respect to the same period of the previous year, due mainly to the mentioned transfer in April 2009 associated to the remnant of operation of Banco de Mexico.

Net Budgetary Public Sector Expenditures during January-April

During the first four months of the year, the net budgetary expenditures of the public sector totaled Ps. 958.7 billion, amount similar in real terms to the one observed in the same period of 2009.

Paid programmable expenditures totaled Ps. 722.6 billion, amount 3.2 percent lower in real

terms than the one observed in the same period of the previous year, due to the effort to anticipate expenditures as part of the countercyclical measures adopted during 2009. Within this item, worth highlighting are the increases in resources channeled to health, social security and investment in the energy sector.

Shared revenues allocated to Federal Entities and Municipalities through shared revenues, decentralization agreements and reallocations increased by 1.4 percent in real terms. Shared revenues increased by 16.6 percent in real terms due to higher Federal shareable revenues, while the remainder of the resources distributed to Federal Entities and Municipalities decreased by 9.4 percent in real annual terms.

The Public Sector's financial cost was Ps. 49.4 billion, amount 20.1 percent lower in real terms than the one registered in the same period of last year, due to lower interest rates and the appreciation of the exchange rate.

Stock of Public Debt as of April

At the end of April, the Federal Government's net domestic debt was Ps. 2,490.8 billion, amount that is Ps. 19.4 billion higher than that observed at the end of 2009. The change in the stock is explained by net indebtedness of Ps. 161.4 billion, by upward adjustments to the inflation indexed debt by Ps. 19.4 billion and by an increase in the Federal Government's financial assets by Ps. 161.4 billion.

The stock of the Federal Government's net external debt in April was US\$ 47.3 billion, amount US\$ 1.1 billion higher than the one observed at the end of 2009. This result is explained by net indebtedness of US\$ 1.0 billion, by downward accounting adjustments by US\$ 0.4 billion and by a decrease in financial assets in foreign currency by US\$ 0.5 billion.

The stock of the Federal Public Sector's net domestic debt (Federal Government, PEDBC's and development banks) at the end of April was Ps. 2,599.4 billion, which implies an increase of Ps. 5.3 billion with respect to the stock recorded at the end of 2009. This is due to net domestic indebtedness during the period of Ps. 155.2 billion, upward accounting adjustments by Ps. 20.6 billion and an increase in the non-financial Public Sector's assets by Ps. 170.5 billion.

The stock of the Federal Public Sector's net external debt was US\$ 94.2 billion, amount that is higher by US\$ 2.5 billion than the one registered at the end of 2009. This result is explained by net external borrowing of US\$ 1.5 billion, downward accounting adjustments by US\$ 0.9 billion and a decrease in foreign financial assets by US\$ 1.9 billion.

More details on Public Finance and Public Debt statistics can be obtained in the Ministry of Finance's web page at:

p./ Preliminary figures.

n.s.: No significant.

1./ In 2009, the liabilities of long term productive infrastructure projects (PIDIREGAS) were converted, in an exceptional manner, into PEMEX's direct public debt with liabilities. The information presented excludes the effect of this conversion because their inclusion would complicate the evaluation of public finance results throughout the year.

2./ In 2009 and 2010, PEMEX's physical investment is excluded.

*_/ Figures subject to revisions and methodological changes.

p_/ Preliminary figures.

1_/ Including the Federal Government, PEDBC's and Development Banks Debt.

2_/ The net debt balances differ from those published in the "Report on Public Finances and Public Debt Fourth Quarter of 2009", due to the modifications of the balances of bank accounts of December 2009 made by the Federal Treasury in February 2010.

3_/ Considers the US Dollar denominated balance of the Federal Treasury's General Account and other federal government assets in foreign currency, as well as other held by PEDBC's and Development Banks.
