

PUBLIC FINANCE AND PUBLIC DEBT REPORT, APRIL 2011

The public finance and public debt preliminary results as of April 2011 were released today.

The main results for the January-April period are the following:

- The total Public Sector deficit and the surplus excluding investment by PEMEX were Ps. 6.6 and Ps. 45.7 billion, respectively, results consistent with the approved public deficit for the year.
- Budgetary revenues were higher by 2.0% in real annual terms. As previously mentioned, the decrease in total revenues observed in January 2011 would be reverted in the following months. By adjusting the comparison base to exclude the use of resources recovered from the FEIPEMEX in February 2010, total Public Sector revenues show an increase of 4.2% in real terms.
- Revenues of public entities under direct budgetary control other than PEMEX, oil revenues and non-oil tax revenues increased by 6.9%, 3.8% and 1.0% in real annual terms, respectively. The moderate increase in non-oil tax revenues is due to the temporary factors that led to a lower tax collection at the beginning of the year.
- Net expenditures were higher by 4.3% in real annual terms. Programmable expenditures increased by 6.9% in real terms and worth highlighting are the increases in resources allocated to social security; drinking water and sewerage; urbanization, housing and regional development; social assistance; education, and health.
- Federal resources transferred to States and Municipalities increased by 6.5% in real terms. Within, shared revenues increased by 3.3% in real terms.
- The Federal Public Sector's net domestic debt increased by Ps. 28.5 billion while net external debt increased by USD 4.6 billion, both with respect to the end of 2010.

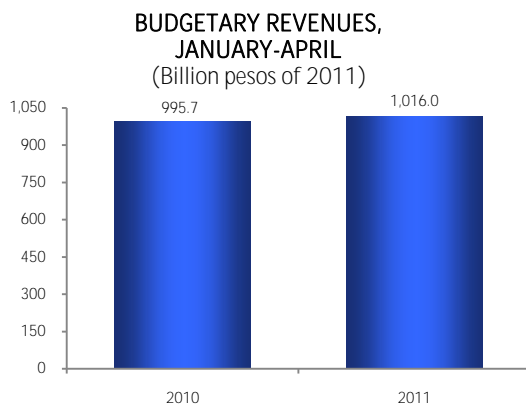

Evolution of the Public Finances during January-April

As of April 2011, the balance of the Public Sector posted a deficit of Ps. 6.6 billion. The primary balance posted a surplus of Ps. 38.2 billion. If investment by PEMEX is excluded, the

balance of the Public Sector registered a surplus of Ps. 45.7 billion. These results are consistent with the approved deficit for 2011, in compliance with Article 17 of the Federal Budget and Fiscal Responsibility Law.

Public Sector Budgetary Revenues during January-April

The Public Sector's budgetary revenues were Ps. 1 trillion 16.0 billion, amount 2.0% higher in real annual terms. As was mentioned in the January report, the decrease in total revenues that was observed in that month was due to temporary factors, which would be reverted in the following months. In addition, Ps. 20.0 billion of non recurrent revenues were recovered from the FEIPEMEX in February of 2010, which implies a higher comparison base for oil revenues. As expected, the annual growth rate of revenues has been increasing and if the comparison base is adjusted to exclude the resources from the FEIPEMEX, total Public Sector revenues show an increase of 4.2% in real terms. The evolution of the main components of budgetary revenues was the following:

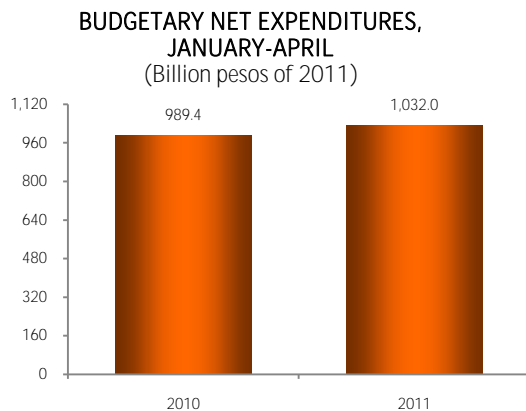

- Non-oil tax revenues were Ps. 500.4 billion, amount higher by 1.0% in real annual terms. In the first four months of 2011, excise tax collection and income tax collection (which includes the IETU and the Tax on Cash Deposits) increased by 11.0 and 4.8% in real terms, respectively. In contrast, VAT collection decreased by 3.2% in real terms. This decrease was caused by an increase in tax rebates and by the high

revenues that were observed at the beginning of 2010 due to tax payments that were anticipated to December 2009, before the application of the fiscal reform in 2010.

- Oil related revenues (which include **PEMEX's own revenues, excise tax** collection on gasoline and diesel, royalties and fees, and taxes on oil returns) totaled Ps. 322.2 billion, amount that is 3.8% higher in real annual terms. This result is explained mainly by the higher price of the Mexican oil mix (90.0 dpb compared with 71.0 dpb observed in the same period of last year), that was partially offset by the real appreciation of the exchange rate by 8.2% in annual terms, the higher value of imports of hydrocarbons by 38.0% in real terms, a lower oil production platform by 1.2% and the use of resources from the Stabilization Fund of PEMEX (FEIPEMEX) by Ps. 20.0 billion in February of 2010. If the resources from the FEIPEMEX are excluded from the comparison base, an increase of 11.2% in real terms is observed.
- Revenues of public entities under direct budgetary control other than PEMEX were Ps. 154.0 billion, which represented an increase of 6.9% in real annual terms. This is mainly explained by higher social security contributions to the IMSS and higher revenues from electricity sales.
- Non-tax non-oil revenues totaled Ps. 39.5 billion, amount lower by 13.5% in real annual terms due to the high non-recurrent revenues that were observed in January-April 2010.

Net Budgetary Public Sector Expenditures during January-April

During the first four months of the year, net budgetary expenditures of the Public Sector totaled Ps. 1 trillion 32.0 billion, amount higher by 4.3% in real annual terms.

Paid programmable expenditures totaled Ps. 797.3 billion, amount higher by 6.9% in real annual terms. Within this item, worth highlighting are the increases in resources allocated to social security; drinking water and sewerage; urbanization, housing and regional development; social assistance; education, and health.

Resources transferred to federal entities and municipalities through shared revenues, decentralization agreements and reallocations increased by 6.5% in real terms. Shared revenues increased by 3.3% in real terms due to higher federal shareable revenues, while the remainder of the resources transferred to federal entities and municipalities increased by 9.5% in real annual terms.

The Public Sector's financial cost was Ps. 45.1 billion, amount 11.9% lower in real terms than the one registered in the same period of last year.

Stock of Public Debt as of April

At the end of April, the Federal Government's net domestic debt was Ps. 2 trillion 817.9 billion, amount Ps. 9.0 billion higher than that observed at the end of 2010. The change in the stock is explained by net indebtedness of Ps. 117.3 billion, by upward adjustments to the inflation indexed debt by Ps. 13.6 billion and an increase in the Federal Government's financial assets by Ps. 121.9 billion.

The stock of the Federal Government's net external debt in April was USD 57.2 billion, amount USD 4.8 billion higher than the one observed at the end of 2010. This result is explained by a net indebtedness by USD 0.6 billion, by upward accounting adjustments by USD 0.5 billion and a decrease in financial assets in foreign currency by USD 3.7 billion.

The stock of the Federal Public Sector's net domestic debt (Federal Government, PEDBC's and development banks) at the end of April was Ps. 2 trillion 948.8 billion, which implies an increase of Ps. 28.5 billion with respect to the stock recorded at the end of 2010. This is due to net domestic indebtedness during the period of Ps. 157.1 billion, upward accounting adjustments by Ps. 14.5 billion and an increase in domestic financial assets by Ps. 143.2 billion.

The stock of the Federal Public Sector's net external debt was USD 109.3 billion, amount that is higher by USD 4.6 billion than the one registered at the end of 2010. This result is explained by upward accounting adjustments by USD 1.2 billion and a decrease in foreign financial assets by USD 3.4 billion.

More details on public finance and public debt statistics can be obtained in the Ministry of Finance's web page at:
