As of July 2011, the balance of the Public Sector posted a deficit of Ps. 164.3 billion. The primary balance posted a deficit of Ps. 12.5 billion. If investment by PEMEX is excluded, the balance of the Public Sector registered a deficit of Ps. 57.6 billion. These results are consistent with the approved deficit for 2011, in compliance with Article 17 of the Federal Budget and Fiscal Responsibility Law.

Public Sector Budgetary Revenues during January-July

The Public Sector's **budgetary revenues** were Ps. 1 trillion 769.5 billion, amount 5.2% higher in real annual terms. As was anticipated in the January report, the annual growth rate of revenues has been increasing throughout the year. The evolution of the main components of budgetary revenues was the following:

**BUDGETARY REVENUES,
JANUARY-JULY**
(Billion pesos of 2011)

- Non-oil tax revenues were Ps. 834.0 billion, amount higher by 2.7% in real annual terms. In the first seven months of 2011, excise tax collection and income tax collection (which includes the IETU and the Tax on Cash Deposits) increased by 10.0 and 5.9% in real terms. In contrast, VAT collection decreased by 1.0% in real terms due to an increase in tax rebates and to the high revenues that were observed at the beginning of 2010 due to tax payments that were anticipated to December 2009, before the fiscal reform came into effect in 2010.
- Oil related revenues (which include **PEMEX's own revenues**, excise tax collection on gasoline and diesel, royalties and fees, and taxes on oil returns) totaled Ps. 589.5 billion, which implies an increase of 10.5% in real annual terms. This result is explained mainly by the higher price of the Mexican oil mix (96.8 dpb compared with 70.6 dpb observed in the same period of last year), that was partially offset by the real appreciation of the exchange rate by 8.8% in annual terms, the higher value of hydrocarbon imports by 41.0% in real terms, a lower oil production platform by 1.0% and the use of resources from the

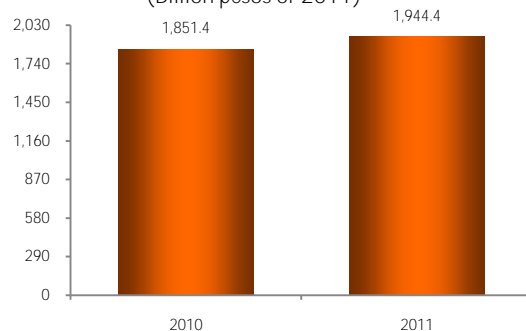

Stablization Fund of PEMEX (FEIPEMEX) by Ps. 20.0 billion in February of 2010.

- Revenues of public entities under direct budgetary control other than PEMEX were Ps. 282.4 billion, which represented an increase of 7.0% in real annual terms. This is mainly explained by higher social security contributions and higher revenues from electricity sales.
- Non-tax non-oil revenues totaled Ps. 63.6 billion, amount lower by 12.3% in real annual terms due to the high non-recurrent revenues that were observed in the same period of last year.

Net Budgetary Public Sector Expenditures during January-July

During the first seven months of the year, net budgetary expenditures of the Public Sector totaled Ps. 1 trillion 944.4 billion, amount higher by 5.0% in real annual terms.

**BUDGETARY NET EXPENDITURES,
JANUARY-JULY**
(Billion pesos of 2011)

Paid programmable expenditures totaled Ps. 1 trillion 493.9 billion, amount higher by 5.9% in real annual terms. Within this item, worth highlighting are the increases in resources allocated to urbanization, housing and regional development; social security; health, and education.

Resources transferred to federal entities and municipalities through shared revenues, decentralization agreements and reallocations increased by 6.4% in real terms. Shared revenues increased by 4.5% in real terms due to higher federal shareable revenues, while the remainder of the resources transferred to federal entities and municipalities increased by 7.8% in real annual terms.

The Public Sector's financial cost was Ps. 147.6 billion, amount 0.6% lower in real terms than the one registered in the same period of last year.

Stock of Public Debt as of July

At the end of July, the Federal Government's net domestic debt was Ps. 2 trillion 978.9 billion, amount Ps. 170.0 billion higher than that observed at the end of 2010. The change in the stock is explained by net indebtedness by Ps. 203.8 billion, upward adjustments to the inflation indexed debt by Ps. 10.3 billion and an increase in the Federal Government's financial assets by Ps. 44.1 billion.

The stock of the Federal Government's net external debt in July was USD 57.7 billion, amount USD 5.4 billion higher than the one observed at the end of 2010. This result is explained by a net indebtedness of USD 1.0 billion, upward accounting adjustments by USD 0.6 billion and a decrease in financial assets in foreign currency by USD 3.7 billion.

The stock of the Federal Public Sector's net domestic debt (Federal Government, PEDBC's and development banks) at the end of July was Ps. 3 trillion 101.3 billion, which implies an increase of Ps. 180.9 billion with respect to the stock recorded at the end of 2010. This is due to net domestic indebtedness during the period of Ps. 233.0 billion, upward accounting

adjustments by Ps. 11.2 billion and an increase in domestic financial assets by Ps. 63.3 billion.

The stock of the Federal Public Sector's net external debt was USD 110.1 billion, amount that is higher by USD 5.4 billion than the one registered at the end of 2010. This result is explained by net indebtedness of Ps. 1.0 billion, upward accounting adjustments by USD 1.4 billion and a decrease in foreign financial assets by USD 3.0 billion.
