

PUBLIC FINANCE AND PUBLIC DEBT REPORT, OCTOBER 2012

The public finance and public debt preliminary results as of October 2012 were released today.

The main results for the January-October period are the following:

- The total deficit of the Public Sector was PS. 163.8 billion. Excluding investment by PEMEX, a surplus of Ps. 59.7 billion is observed. These results are consistent with the approved budget deficit for the year.
- Budgetary revenues were higher by 8.1% in real annual terms. Revenues of public entities under direct budgetary control other than PEMEX, oil revenues and non-oil tax revenues increased by 13.2, 6.1, and 2.7%, respectively.
- Net expenditures were higher by 6.5% in real annual terms. Programmable expenditures increased by 7.8% in real terms.
- Federal resources transferred to federal entities and municipalities increased by 3.2% in real terms, and the increase would be 4.9% when adjusting the base of comparison by the effect of the elimination of the vehicle ownership tax.
- The stocks of the Federal Public Sector's net domestic and external debt increased by Ps. 240.2 billion and USD 8.0 billion, respectively. Both increases are with respect to the end of 2011.

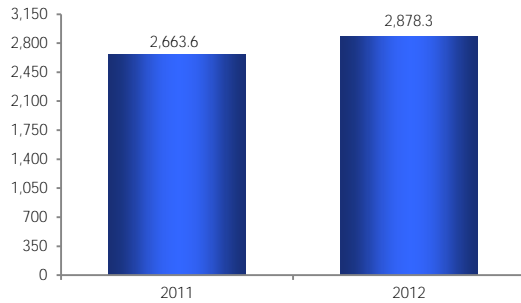

Evolution of the Public Finances during January-October

As of October 2012, the Public Sector posted a deficit of Ps. 163.8 billion. The primary balance posted a surplus of Ps. 34.4 billion. If investment by PEMEX is excluded, the public balance shows a surplus of Ps. 59.7 billion. These results are consistent with the approved deficit for 2012, in compliance with Article 17 of the Federal Budget and Fiscal Responsibility Law.

Public Sector Budgetary Revenues during January-October

The Public Sector's **budgetary revenues** were Ps. 2,878.3 billion, amount 8.1% higher in real annual terms. The evolution of the main components of budgetary revenues was the following:

**BUDGETARY REVENUES,
JANUARY-OCTOBER**
(Billion pesos of 2012)

- Non-oil tax revenues were Ps. 1,257.8 billion, higher by 2.7% in real annual terms. By adjusting revenues for the elimination of the vehicle ownership tax, non-oil tax revenues increased by 3.8% in real terms. Collections from the VAT, taxes on imports and the income tax (including the IETU and the Tax on Cash Deposits) increased by 7.2, 4.9 and 1.7% in real terms, respectively.
- Oil related revenues –which include **PEMEX’s own revenues, excise tax** collection on gasoline and diesel, royalties and fees, and taxes on oil returns – totaled Ps. 971.2 billion, increasing by 6.1% in real annual terms. This result is explained mainly by the higher price of the Mexican oil mix (103.8 dpb compared with 98.1 dpb observed in the same period of last year) and the depreciation of the exchange rate by 5.8%, effects that were partially offset by a lower price of natural gas by 35.7% and a lower oil production platform by 0.3%, all with respect to the same period of 2011.
- Revenues of public entities under direct budgetary control other than PEMEX were Ps. 492.3 billion, which represents an increase of 13.2% in real annual terms. This is mainly explained by higher revenues from

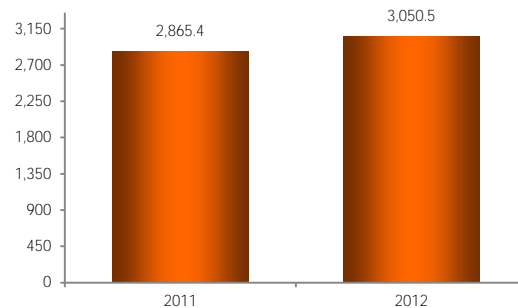

electricity sales, higher social security contributions and other revenues.

- Non-tax non-oil revenues totaled Ps. 157.0 billion, amount higher by 76.8% in real annual terms due to higher non-recurrent revenues and royalties than those observed last year.

Net Budgetary Public Sector Expenditures during January-October

During the first ten months of the year, net budgetary expenditures of the Public Sector totaled Ps. 3,050.5 billion, amount higher by 6.5% in real annual terms.

**BUDGETARY NET EXPENDITURES,
JANUARY-OCTOBER**
(Billion pesos of 2012)

Paid programmable expenditures totaled Ps. 2,427.9 billion, amount higher by 7.8% in real annual terms. Within, worth highlighting are the expenditures allocated to communications; economy, trade and labor; energy and the healthcare sectors.

Resources transferred to federal entities and municipalities through shared revenues, federal contributions, decentralization agreements and reallocations increased by 3.2% in real terms. Shared revenues increased by 0.4% in real terms and the remainder of the resources transferred to the governments of federal entities and municipalities increased by 5.3%

in real annual terms. Adjusting the base of comparison by the effect of the elimination of the vehicle ownership tax, total resources transferred to federal entities and municipalities and shared revenues would increase by 4.9 and 3.7% in real terms, respectively.

The Public Sector's financial cost was Ps. 196.1 billion, amount higher by 8.7% in real annual terms due to the depreciation of the exchange rate and changes in the seasonality of PEMEX's financial cost.

Stock of Public Debt as of October

The stock of the Federal Government's net domestic debt as of October was Ps. 3,323.3 billion, amount Ps. 211.2 billion higher than that observed at the end of 2011. The change in the stock is explained by net indebtedness of Ps. 389.9 billion, upward adjustments to the inflation indexed debt by Ps. 33.1 billion (Ps. 30.4 billion from inflation-indexed debt and Ps. 2.7 billion from debt swap operations) and an increase in the Federal Government's financial assets by Ps. 211.8 billion.

The stock of the Federal Government's net external debt at the end of October was USD 65.8 billion, amount USD 6.2 billion higher than the one observed at the end of 2011. This result is explained by a net indebtedness of USD 4.1 billion, upward accounting adjustments by USD 0.6 billion (USD 0.7 billion from debt swaps and USD -0.1 billion from the revaluation of other currencies with respect to the USD) and by the use of Federal Government's assets by USD 1.5 billion.

The stock of the Federal Public Sector's net domestic debt (Federal Government, PEDBC's and development banks) at the end of October was Ps. 3,498.7 billion, which implies an increase of Ps. 240.2 billion with respect to the stock recorded at the end of 2011. This is due to net domestic indebtedness during the period

of Ps. 392.6 billion, upward accounting adjustments by Ps. 34.3 billion and an increase in domestic financial assets by Ps. 186.7 billion.

The stock of the Federal Public Sector's net external debt was USD 121.7 billion, amount that is higher by USD 8.0 billion than the one registered at the end of 2011. This result is explained by net indebtedness of USD 8.0 billion, upward accounting adjustments by USD 0.5 billion and the accumulation of Public Sector assets by USD 0.5 billion.

More details on public finance and public debt statistics can be obtained in the Ministry of Finance's web page at:
